1. Introduction

Introducing the Taoglas Raptor X MA8007, a low-profile, sleek, 7-in-1 combination antenna engineered for the next generation of routers and gateways. The advanced combination antenna offers dual-band GNSS L1/L5 for exceptional navigational positional accuracy and high-efficiency 5G/4G wideband cellular MIMO connectivity spanning 600-6000MHz for superior mobile connectivity. Applications can be future-proofed with the tri-band Wi-Fi 6 antennas covering 2.4/5.8/7.125GHz.

The Raptor X boasts a compact form factor of just 350 x 70 x 39mm, setting a new market standard for products containing up to 10 antennas. With a height of only 39mm, it is ideal for vehicle roof installations where height constraints are common, typically below 80mm. Its sleek, 70mm design allows it to fit seamlessly on various NEMA cabinets and between the ribs on many vehicle roofs. The MA8007 has an extremely robust IP69K rated enclosure allowing for the most demanding of use cases and applications.

Typical applications include:

- Emergency and First Responder Vehicles
- EV Charger Stations
- Smart Industry and Warehouse Applications
- Private LTE Networks

The MA8007, part of the Raptor X series, offers customization with up to ten connections, one GNSS, four cellular, and five Wi-Fi antennas tailored for specific routers and customer configurations. All cables and connectors can be fully customized to meet your unique requirements.
