Description of Change

Original design the connector would cause tilted issue when during SMT processes. In order to solve this problem, Taoglas change another connector for this design. Through the experiment, the antenna electric characteristics are not changed, and it obvious solve the title issue. So, we will import the solution into our new production process.

Schedule

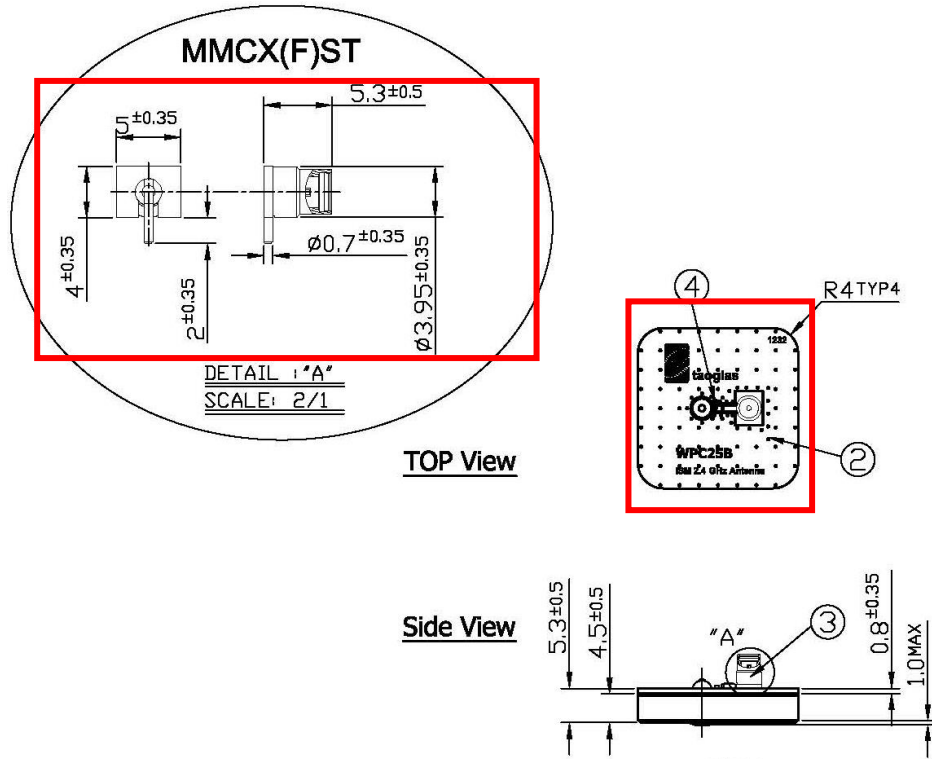

2017, February, Taoglas will process new design into production.

Forecast Estimated Transition Date

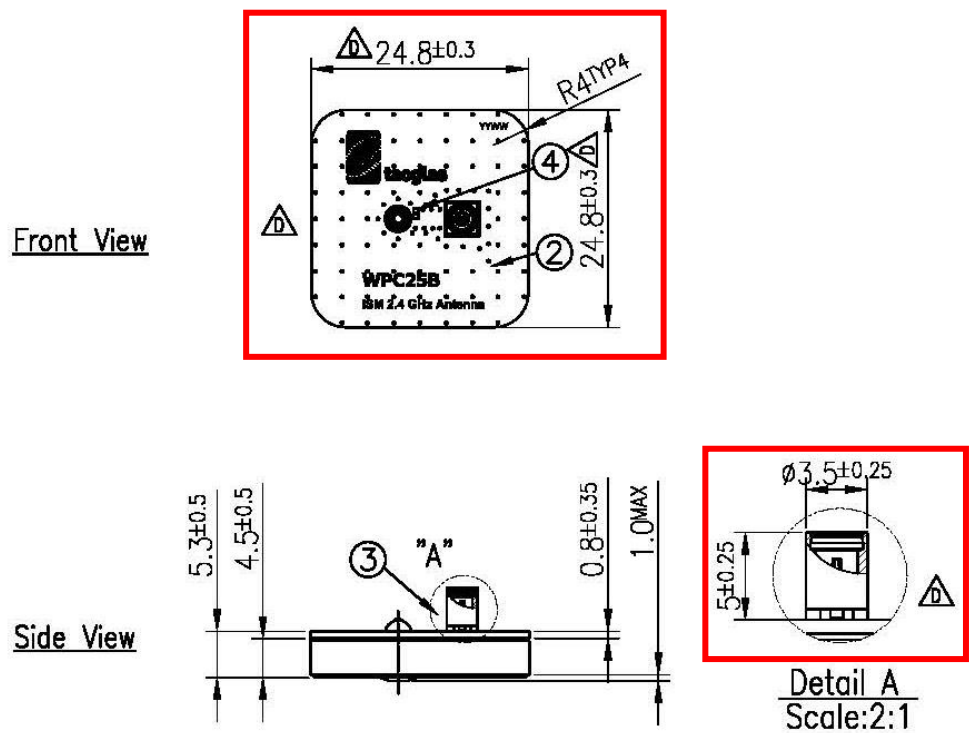

Feb/2017
