

DATASHEET

Taoglas CROWD Insights™

Smarter and safer workplaces with realtime analytics

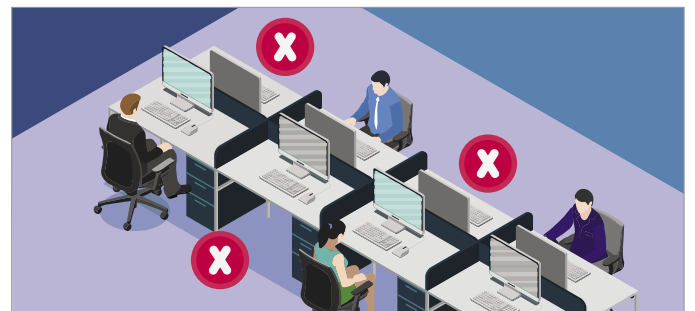

The **Taoglas CROWD Insights™** solution can help businesses and enterprises getting back to work safely. This solution utilizes existing Wi-Fi infrastructure to measure, monitor, predict, alert and notify when capacity limits in different areas are exceeded.

Businesses can use this to:

- Ensure a safe work environment for you staff
- Open businesses and corporate enterprises safely
- Real-time measurements of volumes of people
- Alerts and notifications if limits are approached or exceeded
- Manage employees gatherings and meeting flows
- Analyse visitors arriving and leaving, including their movement
- Gain real-time insights on volumes of customers or members of the public in the premises
- Prove compliance with health and social distancing restrictions
- Actionable data for business operations, planning, economic impact and asset valuation

Key Features

- **PROVEN PLATFORM** to monitor and manage crowds via existing Wi-Fi infrastructure or hotspots, both indoors and outdoors
- **REAL-TIME ACTIONABLE DATA** when you need it, where you need it, with graphical real-time views and alerts
- **CONFIGURABLE** to specific user/stakeholder needs and create easily new zones to monitor
- **CLOUD BASED** and multi-tenancy with multi-platform and multi-vendor capabilities to combine data indoors and out
- **EASY BY DESIGN** and fast to deploy, configure, and use: Results within 1-2 days
- **REMOTE SETUP** and configuration
- **PROTECT YOUR LOCATION** and ensure public health and safety compliance now and into the future
- **LEVERAGE YOUR INVESTMENT** in existing infrastructure to easily monitor and manage crowds - No new hardware required

Real-time Analytics

GDPR Compliant

Crowd Management

Highly Configurable

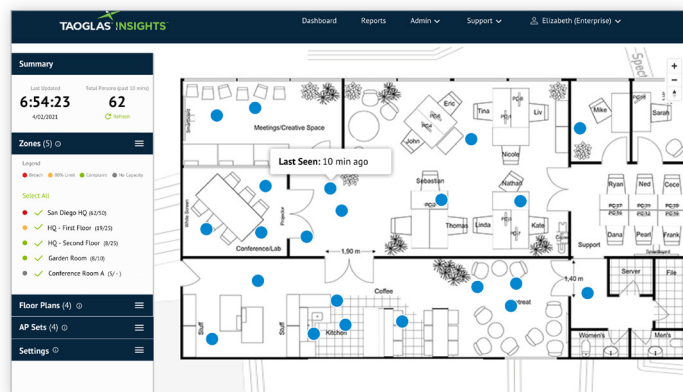

Cloud Based

Multi-Platform

What do you see?

- Solution is based on easy-to-use dashboard to show realtime actionable data.
- Live heatmaps, dwell-times, motion flows, are just a subset of the advanced data-analytics views available.
- The solution is totally flexible and accommodates multi-tenant with both near-real-time views as well as traditional hourly, daily and weekly reports that can be created automatically or on demand.
- Admin can define different zones for different users and the operators will only have access to the data applicable to their zone.

Ideal for

- Workplaces, cities, municipalities, public spaces
- Hospitals, clinics, pharmacies
- Retail
- Large enterprises
- Transportation; airports, train, stations, metros
- Universities and campuses

Workspaces, Urban Spaces and Venues

Capabilities

- Real-time analysis of crowds in:
 - Buildings
 - Venues
